No candidate suffering from any contagious disease will be admitted to the examination room.

(2) No candidate will be allowed to quit the examination room on any day until the expiration of half an hour from the commencement of the examination, and candidates arriving after the expiration of that half hour will not be admitted.

(5) Any candidate suspected of having had recourse to malpractice of any kind is liable to have his examination invalidated and also to be detained from appearing again for any of the examinations under the control of the Commissioner for such term of years as the Commissioner may think fit; or, if the Commissioner is not satisfied with the frankness of his reply, he may be required to undergo a re-examination in any one or more of the subjects of the examination for which he appeared.

In all cases where permission has been granted, the Superintendent or better permitting the change should be produced for the substitution of the respondent here.

(9) A candidate having completed his paper will rise from his seat and remain standing until the Superintendent takes his answer papers. Any candidate wishing to ask any question of the Superintendent will remain the same course, but will or no account leave his place.

The Standard Barometer and Thermometer are used at 8 a.m., 10 a.m., 4 p.m. and 8 p.m., and the daily means are obtained by the application of hourly corrections, obtained from hourly paired observations. The station of the thermometer is always not less than the level of the sun, and the mercury of the rain gauge is not less than the ground. The wind, rain, and general weather registered are for the nearest 1000 feet—down to about 600 feet.

The total quantity of tax collected since January 1976 is 16 512 million, the average due by the same period being 12 54 million.

There were one-hundred-and-fifty-one hours during the month. The combined corresponding in the above column is represented by a S.W. by S. wind, blowing with a uniform daily velocity of 13 miles.

During the first three weeks of the month prevalent north-westerly winds were blowing over the Coromandel and the southern half of the Presidency and the Bombay provinces were directed more strongly than usual towards Southern India. Frequent showers fell over the Presidency during this time. On the 5th a storm entered the Andaman Sea from the east and moved during the next six days in a westerly course towards the Coromandel. It crossed the coast near Chennai on the 11th or 12th and still as strong winds were blowing from the Andaman Sea across the Presidency followed by exceptionally heavy rain in the Coromandel during the period 10th to 15th. Some very heavy falls were recorded in the Coromandel and south of the Presidency also. At Madras the total amount of rain was more than double the normal fall. The air movement was unusually low throughout the month. Thunderstorms occurred on seven days and distant thunder and lightning on nine other days.
